

# The Hamlet Welcomes Author Ian Lange

As a young man Ian Lange was fascinated upon seeing an article in an old Life Magazine about mega Ice Age mammals and was determined to learn as much as he could about the creatures that lived with and ate our ancestors.

Ian is a graduate of Dartmouth with a Ph.D. from the UW in geology and stable isotope geochemistry.

Please join us for this fun and fascinating lecture about the Pleistocene world and its inhabitants. Ian will also present slide illustrations of these ice age mammals; ground sloths, woolly mammoths, saber-toothed cats and more.

Sunday, February 11th, 3 o'clock  
The Gathering Place

More information: call The Hamlet at 468-2620
